

Palladium Fantasy: Spells & Psionics

Adapted for the Shadowdark System

Shadowdark Palladium Adaptation

Introduction

This document contains all spells and psionic powers for the ten spellcasting classes of Palladium Fantasy, adapted for the Shadowdark ruleset.

How spells work in Shadowdark: Spellcasters choose a number of spells at character creation (listed on their class card). To cast a spell, roll 1d20 plus your spellcasting modifier. On an 11+, the spell succeeds. On a 1–10, the spell fails — you still expend the attempt but gain a *Wildcard* die to add to any future roll. Spells have no slots; you may attempt any known spell each round.

Spell tiers reflect raw power. Tier 1 spells are learnable at character creation. Higher tiers become available as you gain levels and talents. Damage scales with tier:

Tier	Single Target	Area Effect
1	1d4 – 1d6	—
2	2d6	1d6
3	4d6	3d6
4	6d6	4d6
5	8d6	8d6

Saving throws use the listed ability (CON, WIS, or STR) against DC 12 at tier 1–2, DC 13 at tier 3, DC 14 at tier 4, and DC 15 at tier 5.
